PEDAGOGY BOOK

Test Preparation - Notes & MCQs

PST / JEST - SST - SPSC - FPSC Screening Tests

Teaching Methods - Lesson Planning - Bloom - Piaget - Assessment - Curriculum

Short Notes - Key Facts & Charts - 183 Practice MCQs with Answer Keys

MR ACADEMY

StudySphere

Free study material for the students of Pakistan - learn, practice, prepare, succeed.

Contents

Chapter 1 - Pedagogy - Bunyadi Tasawwuraat (Basics of Teaching)
Chapter 2 - Teaching Methods (Parhane ke Tareeqay)
Chapter 3 - Lesson Planning (Sabaq ki Mansooba Bandi)
Chapter 4 - Bloom's Taxonomy aur Learning Objectives
Chapter 5 - Child Psychology aur Development (Bache ki Nafsiyat aur Nashonuma)
Chapter 6 - Learning Theories (Seekhne ke Nazariyat)
Chapter 7 - Classroom Management (Class ka Nizam)
Chapter 8 - Assessment aur Evaluation (Jaanch aur Tashkhees)
Chapter 9 - Curriculum (Nisaab) - Matlab aur Aqsaam
Chapter 10 - Inclusive Education, Sawal Poochhna aur Teaching Aids
Mixed Practice Test (All Chapters)
Bloom's Taxonomy Quick-Chart - Levels aur Verbs
Pedagogy Glossary - Alfaz ke Matlab
Exam Tips

How to use this book: Har chapter mein pehle short notes parhein, phir key facts wala khaaka dekhein, aur aakhir mein practice MCQs khud hal karein. Jawab chapter ke aakhir mein diye gaye Answer Key se check karein. Pedagogy ke sawal zyada tar joron (theorist-nazriya, tareeqa-misal) aur farq (formative-summative, validity-reliability) par bante hain - unhein jor aur farq ke saath yaad karein, poora chapter asan ho jayega.

Chapter 1

Pedagogy - Bunyadi Tasawwuraat (Basics of Teaching)

Har teacher test ki bunyaad yahi chapter hai. Pedagogy ka matlab kya hai, parhana (teaching) aur seekhna (learning) mein kya farq hai, aur taleem ke bare maqasid kya hain - ye sawal PST, JEST aur SST ke har paper mein aate hain.

Notes - Asaan Alfaaz Mein

- **Pedagogy ka matlab:** lafz "Pedagogy" Greek lafz **"paidagogos"** se aaya hai - "paida" yani bacha, "agogos" yani rehnumai karne wala. Purane Greece mein paidagogos woh ghulam hota tha jo bache ko school le jata aur us ki dekh bhaal karta tha. Aaj pedagogy ka matlab hai: **bache ko parhane ka ilm aur hunar (science and art of teaching children)**. Badon (adults) ko parhane ke ilm ko **Andragogy** kehte hain.
- **Teaching aur Learning ka farq:** teaching ustaad ki taraf se di jane wali **rehnumai aur targheeb** hai, jabke learning bache ke andar hone wali **tabdeeli (change in behaviour)** hai jo tajurbe se aati hai. Ek mashhoor kahawat hai: "Teaching is causing someone to learn." Ustaad parha sakta hai, magar seekhna bache ka apna amal hai - is liye ache ustaad ki pehchan ye hai ke us ke bache waqai seekh rahe hain, sirf ye nahi ke woh parha raha hai.
- **Education ka maqsad:** taleem sirf maloomat bharna nahi. Us ke bare maqasid ye hain: bache ki **shakhsiyat ki mukammal taraqqi** (zehni, jismani, rohani aur samaji), use behtar shehri banana, zindagi ke liye tayyar karna, aur us ke andar sochne, sawal karne aur faisla karne ki salahiyat paida karna. John Dewey ne kaha tha: **"Education is not preparation for life; education is life itself."**
- **Teacher-Centered aur Child-Centered:** purane tareeqe mein ustaad markaz hota tha - woh bolta tha, bache sunte thay. Jadeed taleem **child-centered** hai: markaz bacha hai, us ki zaroorat, dilchaspi aur raftaar ke mutabiq parhaya jata hai. Aaj ke tamaam PST/JEST tests child-centered approach ko hi sahi mantay hain.
- **Ache Ustaad ki khususiyat:** ache ustaad ke paas (1) apne subject par **gehri maharat**, (2) bacho se **mohabbat aur sabr**, (3) asaan alfaaz mein samjhane ki salahiyat, (4) har bache ko barabar tawajjah, aur (5) khud hamesha seekhne ka shoq hona chahiye. Ustaad hi woh shakhs hai jis ka kirdar (character) bache chup chaap copy karte hain - is liye ustaad khud ek **role model** hota hai.
- **Formal, Non-Formal aur Informal Taleem: Formal** taleem school ki baqaida taleem hai (degree, timetable, syllabus fix). **Non-formal** taleem school se bahar manzoom hoti hai magar us ka bhi syllabus aur target hota hai (masalan adult literacy classes, vocational courses). **Informal** taleem baghair kisi plan ke roz-marra zindagi se milti hai - ghar, dost, mahaul se seekhna.
- **Comenius - Father of Modern Education: John Amos Comenius** (1592-1670) ko aam tor par "Father of Modern Education" kaha jata hai. Us ne sab se pehle tasveeron wali text book banayi aur kaha ke taleem har bache ka haq hai - ameer ho ya ghareeb. Us ke mashhoor usool: asaan se mushkil ki taraf, maloom se na-maloom ki taraf.
- **Article 25-A (Pakistan):** Pakistan ke Aain ke **Article 25-A** ke mutabiq riyasat 5 se 16 saal tak ke har bache ko **muft aur lazmi (free and compulsory)** taleem dene ki paband hai. Ye sawal teacher tests mein bar bar aata hai.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Taleem ki teen aqsaam - ek nazar mein

Formal: school/college ki baqaida taleem - degree milti hai.

Non-formal: manzoom magar school se bahar - literacy centre, silai course.

Informal: baghair plan ke zindagi se seekhna - ghar aur mahaul se.

Box 2: Ache ustaad ka roz ka mamul (routine)

Waqt par class mein aana, tayyari (lesson plan) ke saath.

Har bache ko naam se janna, kamzor ko extra madad dena.

Class ke aakhir mein 2-3 sawal pooch kar check karna ke seekha ya nahi.

Aam Ghaltiyan - Common Mistakes

- Pedagogy aur andragogy mein farq rakhein - pedagogy BACHON ke liye hai, andragogy BADON (adults) ke liye.
- Teaching aur learning ek hi cheez nahi - teaching ustaad ka amal hai, learning bache ke andar tabdeeli hai.
- Article 25-A 5 se 16 saal ki umar ke liye hai - "5 se 18" wala option ghalat hota hai.
- Child-centered ka matlab ye nahi ke ustaad kuch na kare - matlab ye hai ke PLAN bache ki zaroorat se bane, ustaad rehnuma (guide) bane.

Practice MCQs

1. The word "Pedagogy" is derived from which language?

(a) Greek (b) Latin (c) French (d) Arabic

2. In the Greek word "paidagogos", the word "paida" means:

(a) Teacher (b) Child (c) Book (d) School

3. Pedagogy is the science and art of teaching:

(a) Adults (b) Soldiers (c) Children (d) Traders

4. The teaching of adults is called:

(a) Pedagogy (b) Geragogy (c) Heutagogy (d) Andragogy

5. Learning is best defined as:

(a) Memorizing a lesson for one day (b) Sitting quietly in class (c) A relatively permanent change in behaviour through experience (d) Copying notes from the board

6. Who said "Education is not preparation for life; education is life itself"?

(a) John Dewey (b) Plato (c) Aristotle (d) Rousseau

7. John Amos Comenius is known as the father of:

(a) Psychology (b) Sociology (c) Philosophy (d) Modern education

8. In child-centered education, the centre of the whole process is the:

(a) Teacher (b) Child (learner) (c) Textbook (d) Examination

9. Education given in schools with a fixed syllabus, timetable and degrees is called:

(a) Informal education (b) Formal education (c) Non-formal education (d) Distance education

10. Learning that takes place from family, friends and environment without any plan is called:

(a) Formal education (b) Technical education (c) Special education (d) Informal education

11. Organized learning outside the school system, such as adult literacy classes, is called:

(a) Formal education (b) Informal education (c) Non-formal education (d) Higher education

12. According to Article 25-A of the Constitution of Pakistan, the State shall provide free and compulsory education to children of the age:

(a) 5 to 16 years (b) 3 to 12 years (c) 5 to 18 years (d) 6 to 14 years

13. The most important quality of a good teacher is:

(a) Strictness and fear in class (b) Speaking loudly all the time (c) Finishing the syllabus quickly (d) Mastery of subject along with love and patience for children

14. Teaching is most effective when the learner:

(a) Only listens silently (b) Actively participates in the process (c) Only copies the notebook (d) Only prepares for marks

15. Which of the following is NOT an aim of education?

(a) Making the child a passive receiver of information (b) All-round development of the child (c) Preparing the child for life (d) Developing good citizenship

16. The teacher in a modern classroom acts mainly as a:

(a) Dictator (b) Policeman (c) Guide and facilitator (d) Examiner only

17. Comenius wrote the first famous textbook with:

(a) Pictures (b) Only questions (c) Only maps (d) Only stories

Answer Key - Chapter 1

1. (a) 2. (b) 3. (c) 4. (d) 5. (c) 6. (a) 7. (d) 8. (b) 9. (b) 10. (d) 11. (c) 12. (a) 13. (d) 14. (b) 15. (a) 16. (c) 17. (a)

Try Yourself - Quick Drills

1. Pedagogy kis zuban ke lafz se aaya hai?

2. Badon ko parhane ke ilm ko kya kehte hain?

3. Article 25-A kis umar ke bacho ke liye hai?

4. Father of Modern Education kon hai?

5. Jadeed class mein ustaad ka kirdar kya hai?

Drill Answers: 1. Greek se 2. Andragogy 3. 5 se 16 saal 4. John Amos Comenius 5. Rehnuma aur guide (facilitator)

Chapter 2

Teaching Methods (Parhane ke Tareeqay)

Kon si class mein kon sa tareeqa istemal ho - ye faisla ustaad ki sab se bari professional salahiyat hai. Lecture, discussion, demonstration, activity-based aur project method ke faide-nuqsan har test mein pooche jate hain.

Notes - Asaan Alfaaz Mein

- **Lecture Method:** sab se purana aur aam tareeqa - ustaad bolta hai, bache sunte hain. Ye **teacher-centered** hai. Faida: bari class mein zyada maloomat kam waqt mein di ja sakti hai. Nuqsan: bache **passive** rehte hain, chhote bacho ke liye boring ho jata hai. Lecture bari umar ke students aur aala (higher) classes ke liye zyada munasib hai, primary bacho ke liye nahi.
- **Discussion Method:** teacher aur students mil kar kisi topic par **baat-cheet** karte hain. Is se bacho ke andar sochna, bolna aur dusron ki raye sunna aata hai. Discussion tab kamyab hoti hai jab ustaad sawal pochhe, sab ko mauqa de, aur bhatakne par narmi se wapas topic par laye.
- **Demonstration Method:** ustaad koi amal karke **dikhaata** hai - science ka tajurba (experiment), koi machine chalana, naqsha banana. Bache dekh kar seekhte hain. Ye tareeqa "sunne" se zyada taqatwar hai kyunke aankh se dekhi cheez der tak yaad rehti hai. Demonstration ke baad bacho ko khud karke dekhne ka mauqa dena aur bhi behtar hai.
- **Activity-Based Learning:** bacha khud **kar ke seekhta** hai - khel, model banana, role play, group ka kaam. Ye primary classes ke liye sab se asar-daar tareeqa mana jata hai kyunke bacha active hota hai, interest barhta hai aur concept mazboot banta hai. Is ka usool hai: "I do and I understand."
- **Question-Answer Method:** ustaad sawalon ke zariye sabaq aage barhata hai. Ache sawal wahi hain jo bache ko **sochne par majboor** karein. Ye tareeqa class ko jagaye rakhta hai aur ustaad ko pata chalta rehta hai ke bache samajh rahe hain ya nahi.
- **Project Method:** ye tareeqa **William H. Kilpatrick** ne diya. Is mein bache kisi asal masle par kaam karke koi cheez tayyar karte hain - masalan school garden lagana, gaon ka naqsha banana. Bacha planning, team work aur maslay hal karna seekhta hai. Ye "learning by doing" ki behtareen misal hai.
- **Discovery aur Cooperative Learning: Discovery learning** (Jerome Bruner) mein bacha khud talash karke usool dhoondta hai - ustaad jawab nahi deta, raasta dikhata hai. **Cooperative learning** mein bache chhote groups mein mil kar ek dusre ki madad se seekhte hain; team ki kamyabi hi har fard ki kamyabi hoti hai.
- **Socratic Method aur Play Way: Socrates** ka tareeqa sawal-dar-sawal (questioning) tha - woh jawab nahi deta tha, sawalon se talab ilm ke zehen se sach bahar nikalwata tha; ise Socratic method kehte hain. Chhote bacho ke liye **Play Way (khel ke zariye taleem)** sab se munasib hai - Froebel ke Kindergarten ka bunyaadi usool yahi tha.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Kon sa tareeqa kab? - fori guide

Naya topic, bari class, kam waqt: Lecture (magar sawal mila kar).

Science ka tajurba dikhana hai: Demonstration.

Primary bache, concept pakka karna hai: Activity-Based.

Bacho ki raye aur soch ubharni hai: Discussion.

Box 2: Ek ache lecture ki nishaniyan

Shuruaat mein pichhle sabaq se jorna aur maqsad batana.

Beech beech mein sawal aur misalein - sirf bolna nahi.

Aakhir mein 3-4 lines mein khulasa (summary) aur check sawal.

Aam Ghaltiyan - Common Mistakes

- Lecture method teacher-centered hai, child-centered NAHI - test mein ye sawal ulta karke poocha jata hai.
- Project method Kilpatrick ka hai, lecture ya Herbart ka nahi - naam aur tareeqa ka jor pakka karein.
- Demonstration mein sirf USTAAD karta hai; jab bache khud karein to woh activity/practical ban jata hai - farq yaad rakhein.
- Primary bacho ke liye lecture sab se KHARAB intikhab mana jata hai - chhote bacho ke liye play way aur activity best hai.

Practice MCQs

1. Which teaching method is purely teacher-centered, in which students mostly remain passive listeners?

(a) Discussion method (b) Project method (c) Lecture method (d) Activity-based learning

2. The Project Method of teaching was given by:

(a) John Dewey (b) William H. Kilpatrick (c) Froebel (d) Montessori

3. In the demonstration method, the teacher:

(a) Only dictates notes (b) Asks students to read silently (c) Takes a written test (d) Performs the activity himself so that students may observe and learn

4. Activity-based learning is most suitable for:

(a) University classes (b) Professional courses (c) Competitive exams only (d) Primary classes

5. The method in which the teacher draws out knowledge from students through a series of questions is called:

(a) Socratic method (b) Lecture method (c) Dictation method (d) Textbook method

6. Discussion method mainly helps students to develop:

(a) Handwriting speed (b) Memorization power (c) Thinking, expression and listening to others (d) Physical strength

7. Discovery learning is associated with:

(a) B. F. Skinner (b) Jerome Bruner (c) Ivan Pavlov (d) Thorndike

8. In cooperative learning, students learn:

(a) By competing against each other (b) In small groups by helping each other (c) Only from the textbook (d) In complete silence

9. The Kindergarten system of education was introduced by:

(a) Montessori (b) Kilpatrick (c) Froebel (d) Pestalozzi

10. "Learning by doing" is the main principle of:

(a) Lecture method (b) Dictation method (c) Rote method (d) Activity and project methods

11. For teaching a science experiment, the most suitable method is:

(a) Demonstration method (b) Lecture method only (c) Story telling (d) Silent reading

12. The Play Way method is most suitable for:

(a) College students (b) Teacher training only (c) Small children (early classes) (d) Adult learners only

13. A good question-answer session in class mainly keeps the students:

(a) Silent and fearful (b) Busy in copying (c) Away from the topic (d) Active and attentive

14. Which method is considered the oldest and most commonly used method of teaching?

(a) Lecture method (b) Project method (c) Discovery method (d) Cooperative method

15. Montessori method mainly emphasizes:

(a) Long lectures (b) Learning through senses and self-activity with special apparatus (c) Strict punishment (d) Only written work

16. The main disadvantage of the lecture method is that:

(a) It needs too much material (b) It finishes the syllabus slowly (c) It is useful for all ages (d) Students remain passive and may lose interest

17. In the discussion method, the role of the teacher is to:

(a) Remain completely silent (b) Speak alone for full period (c) Guide the discussion and give chance to all (d) Punish students who speak

Answer Key - Chapter 2

1. (c) 2. (b) 3. (d) 4. (d) 5. (a) 6. (c) 7. (b) 8. (b) 9. (c) 10. (d) 11. (a) 12. (c) 13. (d) 14. (a) 15. (b) 16. (d) 17. (c)

Try Yourself - Quick Drills

1. Project Method kis ne diya?
2. Kindergarten kis ne shuru kiya?
3. Sab se purana teaching method konsa hai?
4. Discovery learning kis se jura hai?
5. Socrates ka tareeqa kya tha?

Drill Answers: 1. William H. Kilpatrick ne 2. Froebel ne 3. Lecture method 4. Jerome Bruner se 5. Sawal dar sawal (questioning)

Chapter 3

Lesson Planning (Sabaq ki Mansooba Bandi)

Bina plan ke parhana aise hi hai jese bina naqshe ke safar. Is chapter mein lesson plan ke hisse, Herbart ke marhale, aur rozana/haftawar planning ke usool diye gaye hain.

Notes - Asaan Alfaaz Mein

- **Lesson Plan kya hai:** lesson plan woh **tafseeli khaaka (blueprint)** hai jo ustaad period se pehle tayyar karta hai - aaj kya parhana hai, kis order mein, kin sawalon se, kin cheezon (aids) se, aur aakhir mein kese check karna hai ke bache seekhe ya nahi. Ek mashhoor kahawat: "Jo ustaad plan karne mein fail hota hai, woh fail hone ka plan kar raha hota hai."
- **Lesson Plan ke aham hisse:** (1) **Objectives** - is period ke baad bache kya kar sakenge; (2) **Previous knowledge** - bache pehle se kya jante hain; (3) **Introduction** - dilchasp sawal ya misal se topic se jorna; (4) **Presentation/Development** - asal parhai sawalon aur aids ke saath; (5) **Evaluation** - chand sawalon se check; (6) **Assignment/Homework** - ghar ka kaam.
- **Objectives kese likhein:** acha objective **saaf, napne ke qabil (measurable)** aur bache ke amal par hota hai - masalan "bacha paanch jumlon mein apne gaon ka taaruf likh sakega" (likh sakega = observable behaviour). "Bache ko samajh aa jayegi" acha objective nahi, kyunke "samajh" ko napna mushkil hai.
- **Herbart ke Formal Steps:** Johann Friedrich Herbart ko **scientific pedagogy ka baap** mana jata hai. Us ke lesson plan ke paanch marhale aaj bhi teston mein aate hain: (1) **Preparation** (tayyari - pichli maloomat jagana), (2) **Presentation** (naya content pesh karna), (3) **Association/Comparison** (naye ko purane se jorna), (4) **Generalization** (usool ya nateeja nikalna), (5) **Application** (seekhi cheez istemal karna).
- **Introduction ki ahmiyat:** period ke pehle 3-5 minute sab se qeemti hain. Achi introduction bache ke **previous knowledge** se naya topic jorti hai aur us ke andar "mujhe ye seekhna hai" wali dilchaspi paida karti hai. Sawal, kahani, tasveer ya koi asli cheez dikhana - ye sab introduction ki achi techniques hain.
- **Planning ki aqsaam: Yearly plan** (poora saal syllabus bantna), **Unit plan** (ek chapter/unit ki chand hafto ki planning) aur **Daily lesson plan** (ek period ki tafseel). Teeno ek dusre se jure hote hain - roz ka plan unit se, unit saal se.
- **Blackboard ka istemal:** acha ustaad blackboard par saaf aur tartib se likhta hai - title, tareekh, aham alfaaz (key words) aur diagram. Board work bhi lesson plan ka hissa hota hai: kya likhna hai, kab likhna hai, ye pehle se socha hota hai.
- **Evaluation period ke andar:** lesson plan ka aakhri hissa evaluation hai - 2-4 chhote sawal pooch kar ustaad jaanchta hai ke objectives hasil hue ya nahi. Agar aadhi class jawab na de sake to masla bacho mein nahi, agle period ki planning mein hai - ustaad ko wohi hissa doosre tareeqe se parhana chahiye.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Ek period ka lesson plan - tartib

1. Objectives likho (bache kya kar sakenge).
2. Previous knowledge check (2 sawal).
3. Introduction (dilchasp sawal/misal).

4. Presentation (parhai + aids + sawal).

5. Evaluation (3 sawal) aur homework.

Box 2: Ache objective ki misalein

"Bacha 10 angrezi alfaaz ke sahi matlab likhega." (measurable)

"Bacha Pakistan ke naqshe mein chaar sube nishan lagayega." (observable)

Ghalat misal: "Bache ko geography pasand ajayegi." (napna mushkil)

Aam Ghaltiyan - Common Mistakes

- Herbart ke steps ka pehla marhala Preparation hai, Presentation nahi - tartib ulta karna aam ghalti hai.
- Objective USTAAD ke amal par nahi hota ("mein parhaunga") - bache ke amal par hota hai ("bacha likh sakega").
- Lesson plan sirf daftar ke liye kagaz nahi hai - ye ustaad ki apni rehnumai ke liye hota hai.
- Evaluation ka matlab sirf test nahi - period ke andar ke chand sawal bhi evaluation hain (formative).

Practice MCQs

1. A lesson plan is best described as:

(a) A list of students in the class (b) A detailed blueprint of what and how the teacher will teach in a period (c) A copy of the timetable (d) A record of examination results

2. The first step in Herbart's formal steps of lesson planning is:

(a) Preparation (b) Presentation (c) Application (d) Generalization

3. The correct order of Herbart's steps is:

(a) Presentation, Preparation, Application, Association, Generalization (b) Preparation, Presentation, Association, Generalization, Application (c) Application, Generalization, Association, Presentation, Preparation (d) Association, Presentation, Preparation, Application, Generalization

4. Herbart is regarded as the father of:

(a) Scientific pedagogy (b) Child psychology (c) Modern sociology (d) Special education

5. Instructional objectives should be stated in terms of:

(a) Activities of the teacher (b) Pages of the textbook (c) Marks of the examination (d) Observable behaviour of the learners

6. Which of the following is a well-written objective?

(a) "The student will understand rivers." (b) "The teacher will explain rivers." (c) "The student will write the names of five rivers of Pakistan." (d) "Rivers will be taught today."

7. The purpose of the introduction step in a lesson is to:

(a) Link the new lesson with previous knowledge and create interest (b) Complete the attendance register (c) Give homework to students (d) Check the notebooks

8. Evaluation at the end of a period helps the teacher to know:

(a) Which student is tallest (b) How much syllabus is left in the book (c) When the holidays will start (d) Whether the objectives of the lesson have been achieved

9. A unit plan covers:

(a) Only one period (b) The whole year syllabus (c) A complete unit/chapter spread over several periods (d) Only the examination week

10. In a lesson plan, "previous knowledge" means:

(a) What the teacher studied last year (b) What the students already know about the topic (c) The knowledge of the parents (d) The content of the next chapter

11. Which is NOT a part of a good daily lesson plan?

(a) Objectives (b) Teaching aids to be used (c) List of students who will be punished (d) Evaluation questions

12. The last step of Herbart's lesson plan is:

(a) Preparation (b) Application (c) Association (d) Presentation

13. Blackboard work in a lesson should be:

(a) Neat, organized and planned in advance (b) Written in very small letters (c) Done only by students (d) Avoided completely

14. If most students fail to answer the evaluation questions at the end of a period, the teacher should:

(a) Punish the whole class (b) Ignore it and start a new chapter (c) Blame the students in front of all (d) Re-teach the weak part in the next period using another approach

15. A yearly plan is mainly concerned with:

(a) Distribution of the whole syllabus over the academic year (b) One period's teaching (c) Daily attendance (d) The seating plan of the class

16. The generalization step in Herbart's plan means:

(a) Copying the lesson on the board (b) Deriving a rule or conclusion from the facts presented (c) Giving home task (d) Taking attendance

17. Teaching aids are mentioned in the lesson plan so that:

(a) The class looks beautiful (b) The inspector feels happy (c) The teacher can arrange them before the period begins (d) Students can play with them

Answer Key - Chapter 3

1. (b) 2. (a) 3. (b) 4. (a) 5. (d) 6. (c) 7. (a) 8. (d) 9. (c) 10. (b) 11. (c) 12. (b) 13. (a) 14. (d) 15. (a) 16. (b) 17. (c)

Try Yourself - Quick Drills

1. Herbart ke pehle step ka naam kya hai?
2. Objective kis ke amal par likha jata hai?
3. Scientific pedagogy ka baap kon hai?
4. Unit plan kis ke liye hota hai?
5. Introduction ka maqsad kya hai?

Drill Answers: 1. Preparation 2. Bache (learner) ke amal par 3. Herbart 4. Ek mukammal unit/chapter ke liye 5. Previous knowledge se jorna aur dilchaspi paida karna

Chapter 4

Bloom's Taxonomy aur Learning Objectives

Sawal banana ho ya objective likhna - Bloom ki taxonomy har ustaad ke liye bunyaadi auzaar hai. Cognitive, affective aur psychomotor domains aur un ki sattayein (levels) is chapter ki jaan hain.

Notes - Asaan Alfaaz Mein

- **Taxonomy kya hai:** taxonomy ka matlab hai cheezon ko tartib aur darjon mein bantna (classification). Taleem mein **Benjamin Bloom** aur un ke saathiyon ne 1956 mein learning objectives ko teen bare hisson (domains) mein banta - ye fehrist aaj duniya bhar ke tests mein istemal hoti hai.
- **Teen Domains:** (1) **Cognitive domain** - zehen aur soch se jura (maloomat, samajh, istemal); ye Bloom ki asal taxonomy hai. (2) **Affective domain** - jazbaat, dilchaspi, qadrein (values) aur rawaiya; ye **Krathwohl** ne tayyar ki. (3) **Psychomotor domain** - jismani hunar aur haath ke kaam (likhna, chalana, banana); is par **Simpson** ka kaam mashhoor hai. Acha sabaq aksar teeno ko chhoota hai, magar har test mein cognitive sab se zyada poocha jata hai.
- **Cognitive Domain ke 6 Levels (purani taxonomy):** neeche se upar: **Knowledge** (yaad karna), **Comprehension** (samajhna), **Application** (istemal karna), **Analysis** (hisson mein torna), **Synthesis** (jor kar naya banana), **Evaluation** (parakhna/faisla karna). Neeche ke teen **lower-order** aur upar ke teen **higher-order thinking** kehlate hain.
- **Revised Taxonomy (2001): Anderson aur Krathwohl** ne 2001 mein Bloom ki taxonomy ko revise kiya. Levels ab ye hain: **Remembering, Understanding, Applying, Analyzing, Evaluating, Creating** - farq ye hai ke sab se upar ki satah ab **Creating** hai (purani mein Evaluation sab se upar thi). Test mein revised tartib aye to yehi jawab dein.
- **Har level ke action verbs:** sawal aur objective inh■■ verbs se pehchane jate hain - Remembering: define, list, name; Understanding: explain, summarize; Applying: solve, use, demonstrate; Analyzing: compare, differentiate; Evaluating: judge, justify, criticize; Creating: design, compose, construct. Paper setter yahi verbs MCQs mein istemal karte hain.
- **Affective Domain:** is ki sattayein hain: **Receiving** (sunne/parhne ki tayyari), **Responding** (hissa lena), **Valuing** (qadr karna), **Organization** (qadrein tartib dena), **Characterization** (woh qadrein shakhsiyat ban jayein) - masalan bache ka sach bolna apni aadat bana lena affective domain ki sab se unchi satah hai.
- **Psychomotor Domain:** is mein jismani hunar aate hain - masalan bache ka saaf likhna, tajurbe ke auzaar (apparatus) sahi pakarna, khail mein ball control karna. Simpson ki taxonomy mein pehli satah **Perception** aur aakhri **Origination** (khud nayi harkat banana) hai.
- **Sawal ki satah pehchanna:** agar sawaal sirf tareekh/naam poochhe to Remembering; "apne alfaaz mein samjhao" ho to Understanding; nayi misal par usool chalana ho to Applying; do cheezon ka farq to Analyzing; "kon si policy behtar hai aur kyun" Evaluating; "ek naya plan banao" Creating hai. PST/JEST ke pedagogy MCQs ka bara hissa isi pehchan par hota hai.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Cognitive ladder - neeche se upar (Revised)

1. Remembering - yaad karna (facts, tareekhein).
2. Understanding - samajhna (apne alfaaz mein batana).

3. Applying - nayi surat par istemal.
4. Analyzing - hisso mein torna, farq karna.
5. Evaluating - dalail se parakhna.
6. Creating - naya banana (sab se unchi satah).

Box 2: Ek hi topic, teen satah ke sawal

Remembering: "Photosynthesis ki definition likho."

Applying: "Diye gaye poday par photosynthesis samjhao."

Evaluating: "Do tareeqon mein behtar konsa, kyun?"

Aam Ghaltiyan - Common Mistakes

- Revised taxonomy mein sab se unchi satah CREATING hai, Evaluation nahi - ye farq test ki jaan hai.
- Affective domain jazbaat/values ka hai aur psychomotor jisam/haath ke hunar ka - dono ulta karna aam ghalti hai.
- "Samjhao/explain" Understanding hai, Application nahi - application mein seekhi cheez NAYI surat par chalani hoti hai.
- Krathwohl affective se jura hai, Bloom cognitive se - naamon ke jor pakke karein.

Practice MCQs

1. Bloom’s Taxonomy of educational objectives was presented in the year:

(a) 1946 (b) 1966 (c) 1976 (d) 1956

2. The cognitive domain is mainly concerned with:

(a) Feelings and values (b) Physical skills (c) Knowledge and mental abilities (d) Moral training only

3. The affective domain deals with:

(a) Feelings, interests and values (b) Memorization of facts (c) Hand skills (d) Problem solving

4. The psychomotor domain is related to:

(a) Emotions and attitudes (b) Knowledge and understanding (c) Moral values (d) Physical and motor skills

5. In the revised Bloom’s Taxonomy (2001), the highest level is:

(a) Evaluating (b) Creating (c) Remembering (d) Applying

6. The revised taxonomy was prepared by:

(a) Skinner and Pavlov (b) Anderson and Krathwohl (c) Piaget and Vygotsky (d) Herbart and Froebel

7. Which is the lowest level of the cognitive domain?

(a) Applying (b) Analyzing (c) Evaluating (d) Remembering (Knowledge)

8. A student explains a poem in his own words. This is the level of:

(a) Remembering (b) Creating (c) Understanding (d) Applying

9. A student uses the formula of area to find the area of his own classroom. This is:

(a) Applying (b) Remembering (c) Understanding (d) Evaluating

10. Comparing two stories and pointing out their differences is an example of:

(a) Remembering (b) Applying (c) Receiving (d) Analyzing

11. Judging which of the two essays is better, with reasons, belongs to:

(a) Understanding (b) Evaluating (c) Applying (d) Remembering

12. Composing an original poem on a given theme is an example of:

(a) Creating (b) Remembering (c) Understanding (d) Analyzing

13. The affective domain taxonomy was developed mainly by:

(a) Bloom alone (b) Simpson (c) Krathwohl (d) Skinner

14. The psychomotor domain is most commonly associated with the work of:

(a) Simpson (b) Krathwohl (c) Thorndike (d) Bruner

15. Which set of verbs belongs to the Remembering level?

(a) Judge, justify, criticize (b) Design, compose, construct (c) Define, list, name, recall (d) Compare, differentiate, examine

16. Which three levels are called higher-order thinking skills?

(a) Remembering, Understanding, Applying (b) Analyzing, Evaluating, Creating (c) Receiving, Responding, Valuing (d) Perception, Set, Guided response

17. Habits like honesty becoming a permanent part of a child’s character belong to which domain?

(a) Cognitive domain (b) Psychomotor domain (c) None of these (d) Affective domain

Answer Key - Chapter 4

1. (d) 2. (c) 3. (a) 4. (d) 5. (b) 6. (b) 7. (d) 8. (c) 9. (a) 10. (d) 11. (b) 12. (a) 13. (c) 14. (a) 15. (c) 16. (b) 17. (d)

Try Yourself - Quick Drills

1. Bloom ki taxonomy kis saal ayi?
2. Revised taxonomy mein sab se unchi satah konsi hai?
3. Jazbaat aur values kis domain mein aate hain?
4. "Explain" kis level ka verb hai?
5. Psychomotor domain kis cheez se jura hai?

Drill Answers: 1. 1956 mein 2. Creating 3. Affective domain 4. Understanding ka 5. Jismani aur haath ke hunar se

Chapter 5

Child Psychology aur Development (Bache ki Nafsiyat aur Nashonuma)

Bacha kese barhta hai, kese sochta hai aur har umar mein us ki zarooratein kya hoti hain - ustaad ke liye ye samajhna utna hi zaroori hai jitna subject. Piaget ke marhale is chapter ka markaz hain.

Notes - Asaan Alfaaz Mein

- **Growth aur Development ka farq: Growth** (nashonuma ki miqdari barhotri) jism ki size mein izafa hai - qadd, wazan; ye **napne (measure)** ke qabil hai aur ek umar par ruk jati hai. **Development** is se wasi (broad) hai - ye salahiyaton, soch, jazbaat aur hunar ki taraqqi hai; ye **miqdar + qabiliyat (quantitative + qualitative)** dono hai aur zindagi bhar chalti hai. Test mein ye farq pakka poocha jata hai.
- **Development ke usool:** (1) Development ek **tartib (sequence)** se hoti hai - bacha pehle baithta hai, phir khara hota hai, phir chalta hai; ye tartib har bache mein ek jaisi hai. (2) Ye **sarr se paon ki taraf (cephalocaudal)** aur **markaz se kinaron ki taraf (proximodistal)** hoti hai. (3) Har bache ki raftaar apni hai - **individual differences** nature ka usool hai. (4) Development par **warzsat (heredity)** aur **mahaul (environment)** dono asar karte hain.
- **Piaget ki Cognitive Development: Jean Piaget** ne bache ki soch ki taraqqi ko chaar marhalon mein banta. Us ka khayal tha ke bacha ek **chhota scientist** hai jo duniya ko khud explore karke seekhta hai - ustaad ka kaam tayyar mahol aur tajurbay dena hai, jawab bharna nahi.
- **Piaget ke Chaar Marhale:** (1) **Sensorimotor (0-2 saal)** - bacha hawas (senses) aur harkaton se seekhta hai; is umar mein "object permanence" (cheez chhup jaye to bhi mojood hai) seekhta hai. (2) **Preoperational (2-7 saal)** - zuban tez hoti hai, khel aur tasawwur (pretend play) hota hai, magar soch **egocentric** (sirf apni nazar) hoti hai aur conservation (miqdar ek jaisi rehna) nahi samajhta. (3) **Concrete Operational (7-11 saal)** - asal cheezon par mantaqi (logical) soch aati hai, conservation samajh jata hai, magar abstract soch mushkil hoti hai. (4) **Formal Operational (11 saal se aage)** - abstract, farzi (hypothetical) aur mantaqi soch mumkin ho jati hai.
- **Primary bache kis marhale mein:** 7-11 saal wale bache **Concrete Operational** marhale mein hote hain - is liye primary ustaad ko har concept **asal cheezon, models, tasveeron aur activities** se parhana chahiye, sirf zabani lecture se nahi. Ye waja hai ke primary mein activity-based learning par itna zor hai.
- **Individual Differences:** koi do bache ek jaise nahi hote - zehen, raftaar, dilchaspi, mahaul sab mukhtalif. Ache ustaad ki pehchan yehi hai ke woh **tez, average aur slow learner** teeno ke liye alag madad rakhta hai - tez ko extra challenge, slow ko extra waqt aur misalein.
- **Adolescence (Balughat ka dor):** taqreeban **13-19 saal** ka dor adolescence kehlata hai - tezi se jismani tabdeeli, jazbaati utaar charhao aur "mein kon hoon" (identity) ki talash ka dor. Is umar ke bacho ko saza se zyada **samajh, izzat aur rehnumai (guidance)** ki zaroorat hoti hai.
- **Play (Khel) ki ahmiyat:** khel bache ke liye waqt-zaya nahi - khel se bacha jismani taaqat, samaji usool (baari lena, share karna), zuban aur takhleeq (creativity) seekhta hai. Is liye chhoti classon mein "learning through play" ko taleem ka buniadi usool mana jata hai.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Piaget ke marhale - umar ke saath

Sensorimotor: 0-2 saal (hawas aur harkat).

Preoperational: 2-7 saal (zuban, pretend play, egocentric).

Concrete Operational: 7-11 saal (asal cheezon par logic).

Formal Operational: 11+ saal (abstract soch).

Box 2: Growth vs Development - fori farq

Growth: qadd/wazan barhna - napna mumkin, ruk jati hai.

Development: salahiyat aur soch ki taraqqi - zindagi bhar.

Misal: ungliyon ka barhna growth, un se likhna seekhna development.

Aam Ghaltiyan - Common Mistakes

- Growth sirf miqdar hai, development miqdar + qabiliyat - "development sirf jism ka barhna hai" wala option hamesha ghalat hai.
- Primary bache (7-11) Concrete Operational mein hain, Formal mein nahi - abstract lecture un ke liye munasib nahi.
- Preoperational bache ki soch egocentric hoti hai - is ka matlab ghuroor nahi, matlab hai woh dusre ki nazar se nahi dekh sakta.
- Object permanence Sensorimotor marhale ki kamyabi hai, Preoperational ki nahi.

Practice MCQs

1. Growth is best described as:

(a) Qualitative change in abilities (b) Change in behaviour only (c) Development of character (d) Quantitative increase in size which can be measured

2. Development differs from growth because development is:

(a) Both quantitative and qualitative and continues throughout life (b) Only increase in height (c) Only increase in weight (d) Stopped after childhood

3. The theory of cognitive development was given by:

(a) B. F. Skinner (b) Ivan Pavlov (c) Jean Piaget (d) John Dewey

4. How many stages are there in Piaget’s theory of cognitive development?

(a) Two (b) Four (c) Three (d) Five

5. The sensorimotor stage of Piaget covers the age:

(a) 2 to 7 years (b) 0 to 2 years (c) 7 to 11 years (d) 11 years onwards

6. Object permanence develops in which stage of Piaget?

(a) Preoperational stage (b) Concrete operational stage (c) Sensorimotor stage (d) Formal operational stage

7. The preoperational stage covers the age group:

(a) 0 to 2 years (b) 7 to 11 years (c) 12 to 15 years (d) 2 to 7 years

8. Egocentric thinking is a main feature of which stage?

(a) Preoperational stage (b) Sensorimotor stage (c) Concrete operational stage (d) Formal operational stage

9. Children of primary classes (7-11 years) are generally in Piaget's stage of:

(a) Sensorimotor (b) Preoperational (c) Concrete operational (d) Formal operational

10. Abstract and hypothetical thinking becomes possible in the stage of:

(a) Sensorimotor (b) Preoperational (c) Concrete operational (d) Formal operational

11. Understanding of conservation (quantity remains same despite change in shape) develops in:

(a) Concrete operational stage (b) Sensorimotor stage (c) Early preoperational stage (d) Formal operational stage only

12. Development proceeds from head to toe. This principle is called:

(a) Proximodistal (b) Cephalocaudal (c) Inter-relation (d) Continuity

13. Development is the product of:

(a) Heredity only (b) Environment only (c) School only (d) Heredity and environment both

14. The period of adolescence is generally considered:

(a) About 2 to 6 years (b) About 6 to 12 years (c) About 13 to 19 years (d) About 20 to 30 years

15. Individual differences among children mean that:

(a) All children learn at the same speed (b) No two children are exactly alike in abilities and pace of learning (c) Children differ only in height (d) Differences should be ignored by the teacher

16. For a slow learner, the best help by a teacher is:

(a) Extra time, simple examples and encouragement (b) More punishment (c) Ignoring him in class (d) Giving him the hardest tasks

17. Play is important for young children because through play they learn:

(a) Only how to waste time (b) Social rules, language and motor skills naturally (c) Only competition and fighting (d) Only physical exercise

Answer Key - Chapter 5

1. (d) 2. (a) 3. (c) 4. (b) 5. (b) 6. (c) 7. (d) 8. (a) 9. (c) 10. (d) 11. (a) 12. (b) 13. (d) 14. (c) 15. (b) 16. (a) 17. (b)

Try Yourself - Quick Drills

1. Piaget ke kul kitne marhale hain?
2. 7-11 saal ke bache kis marhale mein hote hain?
3. Object permanence kis marhale mein banti hai?
4. Growth aur development mein bara farq kya hai?
5. Adolescence ki taqreebi umar kya hai?

Drill Answers: 1. Chaar 2. Concrete Operational mein 3. Sensorimotor (0-2 saal) mein 4. Growth sirf miqdar; development miqdar + qabiliyat 5. 13 se 19 saal

Chapter 6

Learning Theories (Seekhne ke Nazariyat)

Bacha seekhta kese hai - is sawal ke teen bare jawab hain: aadat se (behaviorism), mashq aur inaam se, aur mahol aur rehnumai se (Vygotsky). Pavlov, Skinner, Thorndike aur Vygotsky ke naam har paper mein milte hain.

Notes - Asaan Alfaaz Mein

- **Learning ki definition:** learning woh amal hai jis se **tajurbe aur mashq** ke natay mein bache ke ravaiye (behaviour) mein **nisbatan mustaqil tabdeeli** aati hai. Thakan, nasha ya bemaari se aane wali aarzi tabdeeli learning nahi hoti.
- **Pavlov - Classical Conditioning: Ivan Pavlov** (Russian scientist) ne kutton par tajurba kiya: ghanti bajane ke baad khana diya jata raha, kuch arse baad sirf ghanti sun kar kutto ke munh mein laab (saliva) aane laga. Is seekhne ko **Classical Conditioning** kehte hain - do cheezon ke jor (association) se seekhna. Class mein is ki misal: bacha kisi subject se tab darta hai jab us subject ke saath bar bar saza ya beizzati jor di gayi ho - ustaad ka rawaiya hi ghanti hai.
- **Skinner - Operant Conditioning: B. F. Skinner** ne kaha ke hum apne amal ke **nataij** se seekhte hain. Jis amal par **inaam/tareef (reinforcement)** mile, woh bar bar hota hai; jis par saza mile, woh kam hota jata hai. Skinner ne choohay par "Skinner Box" ka tajurba kiya. Class mein is ka usool: ache kaam ki **fori tareef** bache ki sab se bari taqat hai; saza ka asar aarzi aur nuqsanda hota hai.
- **Reinforcement ki aqsaam: Positive reinforcement** - achi cheez dena (tareef, star, inaam) taake amal barhe. **Negative reinforcement** - na-pasandeeda cheez khatm karna (masalan acha kaam ho to extra bojh khatm) taake amal barhe. Note karein: negative reinforcement **saza nahi** hai - dono reinforcement amal ko BARHATE hain, saza amal ko kam karti hai (aur woh bhi buray asraat ke saath).
- **Thorndike - Trial and Error aur Laws of Learning: Edward Thorndike** ne billi ko puzzle box mein rakha; billi koshish aur ghalti (trial and error) se darwaza kholna seekh gayi. Us ke mashhoor **Laws of Learning**: (1) **Law of Readiness** - bacha tayyar ho to seekhna asaan; (2) **Law of Exercise** - mashq (practice) se seekhna pakka hota hai; (3) **Law of Effect** - jis amal ka nateeja acha lage, woh phir kiya jata hai.
- **Vygotsky - Social Learning aur ZPD: Lev Vygotsky** ne kaha ke bacha **tanha nahi, samaj mein** seekhta hai - zuban, baray aur dost us ki soch banate hain. Us ka mashhoor tasawwur **ZPD (Zone of Proximal Development)** hai: woh faasla jo bacha **akela** kar sakne aur **rehnumai ke saath** kar sakne ke darmiyan hai. Acha ustaad bilkul isi zone mein parhata hai - na itna asaan ke bore ho, na itna mushkil ke haar man le.
- **Scaffolding:** ZPD ke andar di jane wali **aarzi madad** ko scaffolding kehte hain - jese building banne tak lagaya jane wala aarzi sahara. Ustaad pehle poori misal kar ke dikhata hai, phir adha bache se karwata hai, phir madad hata kar bache ko khud karne deta hai. Madad hamesha **waqfay se khatm** hoti hai.
- **Constructivism - maani khud banana:** is nazriye ke mutabiq bacha maloomat ka khali bartan nahi - woh apni purani maloomat par **nayi maani khud tameer (construct)** karta hai. Is liye ustaad ko chahiye ke woh har naye topic ko bache ke **previous knowledge** se jore aur use khud talash, sawal aur tajurbe ka mauqa de. Bruner aur Piaget isi soch ke numainde hain.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Teen theories - ek ek line mein

Pavlov: jor (association) se seekhna - ghanti + khana.

Skinner: nataij se seekhna - inaam amal barhata hai.

Thorndike: koshish-ghalti + mashq - readiness, exercise, effect.

Box 2: Class mein reinforcement ki misalein

Acha jawab: fori tareef - "Shabash, bilkul sahi socha!"

Star/sticker dena: positive reinforcement.

Saza dhamki se kaam karwana: aarzi asar, lambay nuqsan.

Aam Ghaltiyan - Common Mistakes

- Pavlov = classical (jor/association), Skinner = operant (nataij/reinforcement) - ye jor ulta karna sab se aam ghalti hai.
- Negative reinforcement SAZA nahi hai - woh bhi amal ko barhata hai; saza amal ko kam karti hai.
- ZPD Vygotsky ka tasawwur hai, Piaget ka nahi - aur scaffolding isi ZPD ke andar ki madad hai.
- Law of Exercise ka matlab sirf "mashq" hai - "inaam wala qanoon" Law of Effect hai, Exercise nahi.

Practice MCQs

1. Classical conditioning theory was given by:

(a) Ivan Pavlov (b) B. F. Skinner (c) Thorndike (d) Vygotsky

2. Pavlov conducted his famous experiments on:

(a) Cats (b) Rats (c) Pigeons (d) Dogs

3. Operant conditioning is associated with:

(a) Ivan Pavlov (b) Jean Piaget (c) B. F. Skinner (d) Jerome Bruner

4. In Skinner’s theory, behaviour is mainly learned through:

(a) Its consequences (reinforcement and punishment) (b) Association of two stimuli (c) Imitation only (d) Memorization only

5. Trial and Error theory of learning was given by:

(a) Skinner (b) Pavlov (c) Kohler (d) Thorndike

6. Thorndike used which animal in his puzzle box experiments?

(a) Dog (b) Rat (c) Cat (d) Monkey

7. The law which says that practice makes learning permanent is:

(a) Law of readiness (b) Law of exercise (c) Law of effect (d) Law of primacy

8. According to the Law of Effect, a learner repeats those actions which:

(a) Are very difficult (b) Are punished (c) Give satisfaction or a pleasant result (d) Are done only once

9. A teacher praises a student immediately for a good answer. This is an example of:

(a) Punishment (b) Positive reinforcement (c) Negative reinforcement (d) Extinction

10. Which of the following is TRUE about negative reinforcement?

(a) It increases behaviour by removing something unpleasant (b) It is the same thing as punishment (c) It always decreases behaviour (d) It has no role in learning

11. The concept of Zone of Proximal Development (ZPD) was given by:

(a) Jean Piaget (b) B. F. Skinner (c) Albert Bandura (d) Lev Vygotsky

12. ZPD means the distance between:

(a) What a child can do alone and what he can do with guidance (b) Two classrooms (c) Home and school (d) Teacher and student

13. The temporary support given to a learner within the ZPD, which is gradually removed, is called:

(a) Conditioning (b) Scaffolding (c) Reinforcement (d) Rote learning

14. According to Vygotsky, learning is mainly a:

(a) Solitary process (b) Mechanical process (c) Social process (d) Biological process only

15. Constructivism says that the learner:

(a) Passively receives knowledge (b) Only memorizes given facts (c) Learns only through punishment (d) Actively constructs his own knowledge

16. A child fears a subject because he was repeatedly scolded in that class. This is an example of:

(a) Operant conditioning (b) Trial and error (c) Classical conditioning (d) Insight learning

17. According to the Law of Readiness, learning is best when the learner is:

(a) Mentally and physically ready and willing to learn (b) Forced to learn (c) Very tired (d) Not interested at all

Answer Key - Chapter 6

1. (a) 2. (d) 3. (c) 4. (a) 5. (d) 6. (c) 7. (b) 8. (c) 9. (b) 10. (a) 11. (d) 12. (a) 13. (b) 14. (c) 15. (d) 16. (c) 17. (a)

Try Yourself - Quick Drills

1. Classical conditioning kis ne di?
2. ZPD kis ka tasawwur hai?
3. Law of Effect ka matlab kya hai?
4. Scaffolding kya hoti hai?
5. Skinner ke tajurbe kis janwar par hue?

Drill Answers: 1. Ivan Pavlov ne (kutto par tajurba) 2. Vygotsky ka 3. Acha nateeja amal ko dohraya jata hai 4. Seekhne ke doran di jane wali aarzi madad 5. Choohay par (Skinner Box)

Chapter 7

Classroom Management (Class ka Nizam)

Seekhna tab hota hai jab class ka mahaul seekhne ke qabil ho. Discipline, rules, waqt ki pabandi aur motivation - in chaar cheezon par hi class ka nizam khara hota hai aur har test mein ye sawal aate hain.

Notes - Asaan Alfaaz Mein

- **Classroom management kya hai:** woh tamam tareeqay jin se ustaad class mein **pur-aman, manzoom aur seekhne wala mahaul** banata hai - seating, rules, waqt ki taqseem, saza ki bajaye samajhdari, aur har bache ko masroof rakhna. Research kehti hai ke ache teachers ka zyada waqt "discipline ki larai" mein nahi, **masla hone se pehle ki planning** mein lagta hai.
- **Discipline ka asal matlab:** discipline ka matlab danda nahi - ye lafz "disciple" (shagird) se jura hai, yani **seekhne ke liye khud ko manzoom karna (self-discipline)**. Asli discipline woh hai jab bache ustaad ki gair-mojudgi mein bhi nizam rakhein. Darr wali khamoshi discipline nahi, sirf aarzi qaboo hai.
- **Class rules kese banayein:** (1) Rules **kam aur saaf** hon (4-5 kafi hain); (2) rules **positive alfaaz** mein hon ("bolne se pehle haath uthao" - "shor mat karo" ki bajaye); (3) rules **bacho ke saath mil kar** banayein to woh un par zyada amal karte hain; (4) rules par **roz amal** ho - ek din chhoot, dusre din sakhti nizam ko khatm kar deti hai.
- **Corporal punishment:** Pakistan mein bacho par **jismani saza mana (prohibited)** hai aur honi bhi nahi chahiye - research saaf kehti hai ke mar peet se bacha seekhna nahi, ustaad aur school se **nafrat aur dar** seekhta hai, aur aksar school chhor deta hai. Us ki jagah: private mein pyar se samjhanna, ghalti ka nateeja batana, acha rawaiya tareef se barhana.
- **Motivation (Targheeb):** seekhne ki andar ki aag ko motivation kehte hain. Is ki do aqsaam hain: **Intrinsic motivation** - bacha khud dilchaspi se seekhe (shoq, fakharr); ye sab se mazboot aur derpa hoti hai. **Extrinsic motivation** - bahar ke inaam: marks, certificate, taufeef. Ache ustaad bahar ke inaam se shuru karke bache ko dheere dheere andar ke shoq ki taraf le jata hai.
- **Waqt ki taqseem:** 40 minute ke period ko zaya hone se bachana bhi management hai - pehle 5 minute introduction, darmiyan parhai aur activity, aakhir 5 minute evaluation aur khulasa. Jo ustaad period ka pehla hissa hagri (attendance) aur shor mein zaya kar de, us ka saal ka bara hissa zaya ho jata hai.
- **Seating arrangement:** bethne ki tartib bhi taleem hai - kamzor aur tez bache **mix** bithane se peer learning hoti hai; jis bache ko board kam dikhta hai use aage ki seat dena us ka haq hai; group work ke doran benches ghuma kar circle/halqa banana discussion ko asaan karta hai.
- **Shoor wali class ka hal:** chillana hal nahi. Tasleem-shuda tareeqay: awaz **neeche** karna (bache khud khamosh hote hain), haath ke ishare ka signal tay karna, active activity dena, qareeb ja kar narmi se naam lena. Asal waja hamesha bore wala sabaq ya khali waqt hota hai - ustaad apne plan ko behtar kare, shor khud kam ho jayega.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Class rules - positive alfaaz mein misalein

"Ek waqt mein ek hi bole, baqi sunain."

"Apni cheezein tartib se rakhein."

"Dusron ki baat izzat se sunain."

Box 2: Motivation - dono aqsaam

Intrinsic: bacha kahani sirf shoq se parhe.

Extrinsic: ache marks par certificate mile.

Hadaf: bahar ke inaam se andar ke shoq tak safar.

Aam Ghaltiyan - Common Mistakes

- Discipline ka matlab saza nahi - self-discipline hai; darr wali khamoshi asal discipline nahi hoti.
- Intrinsic motivation extrinsic se zyada mazboot aur derpa hoti hai - "inaam wali hamesha behtar" ghalat hai.
- Jismani saza Pakistan mein mana hai - test mein "halki mar kabhi kabhi theek hai" wala option bhi ghalat mana jata hai.
- Rules zyada hone se nizam behtar nahi hota - kam, saaf aur baqaida amal wale rules asar karte hain.

Practice MCQs

1. The main purpose of classroom management is to:

(a) Keep students afraid of the teacher (b) Finish the syllabus at any cost (c) Maintain complete silence all day (d) Create an orderly environment where learning can take place

2. True discipline in a classroom means:

(a) Silence due to fear of punishment (b) Self-discipline developed in students (c) Daily corporal punishment (d) Keeping students busy in copying

3. Class rules are most effective when they are:

(a) Very long and complicated (b) Few, clear, positive and made with students' participation (c) Made only to frighten students (d) Changed every day

4. Corporal punishment of children in schools is:

(a) Recommended for weak students (b) The best way to maintain discipline (c) Allowed if given lightly (d) Prohibited and harmful for learning

5. Motivation which comes from within the learner, like interest and enjoyment, is called:

(a) Extrinsic motivation (b) Negative motivation (c) Intrinsic motivation (d) Forced motivation

6. Learning for the sake of marks, prizes and certificates is an example of:

(a) Extrinsic motivation (b) Intrinsic motivation (c) Social learning (d) Insight learning

7. Which type of motivation is stronger and lasts longer?

(a) Extrinsic motivation (b) Motivation through fear (c) Motivation through punishment (d) Intrinsic motivation

8. When a class becomes noisy during a lesson, the best first step for the teacher is to:

(a) Shout louder than the students (b) Lower his own voice and use an agreed attention signal (c) Punish the whole class (d) Leave the classroom

9. The most common reason for disturbance in class is:

(a) Boring lesson and unoccupied (idle) time of students (b) Students sitting together (c) Use of teaching aids (d) Group activities

10. Arranging weak and bright students together benefits the class because:

(a) It makes copying easy (b) It saves the teacher's time only (c) It promotes peer learning and mutual help (d) It creates competition and jealousy

11. In a 40-minute period, evaluation and summary should ideally be done:

(a) In the last few minutes of the period (b) At the start of next month (c) Only in the annual exam (d) Never

12. A student repeatedly disturbs the class. The best approach is to:

(a) Beat him in front of the class (b) Send him out of school forever (c) Understand the reason, talk to him privately and keep him engaged (d) Ignore him completely all year

13. Positive classroom rules are stated as:

(a) What not to do only, e.g. "Never speak" (b) What to do, e.g. "Raise your hand to speak" (c) Long lists of punishments (d) Threats and warnings

14. Which of the following is NOT a part of good classroom management?

(a) Clear routines and procedures (b) Proper use of time (c) Fair and consistent behaviour of teacher (d) Humiliating weak students in front of others

15. A teacher's behaviour with students should be:

(a) Strict with some and lenient with favourites (b) Unpredictable every day (c) Friendly only with bright students (d) Fair, consistent and respectful to all

16. The first few minutes of a period are best used for:

(a) Settling the class and introducing the lesson through previous knowledge (b) Completing pending registers (c) Scolding latecomers at length (d) Announcing punishments

17. Grouping students for group work is part of:

(a) Only examination system (b) Only school administration (c) Classroom management and teaching strategy both (d) Only sports activities

Answer Key - Chapter 7

1. (d) 2. (b) 3. (b) 4. (d) 5. (c) 6. (a) 7. (d) 8. (b) 9. (a) 10. (c) 11. (a) 12. (c) 13. (b) 14. (d) 15. (d) 16. (a) 17. (c)

Try Yourself - Quick Drills

1. Asli discipline ka matlab kya hai?
2. Intrinsic motivation kya hoti hai?
3. Jismani saza ke baare mein Pakistan ka usool kya hai?
4. Class rules kitne aur kese honay chahiye?
5. Shoor wali class mein pehla qadam?

Drill Answers: 1. Self-discipline (khud nizam rakhna) 2. Andar ke shoq se seekhna 3. Mana (prohibited) hai 4. Kam, saaf, positive - bacho ki shirkat se 5. Apni awaz neeche karna aur tay

shuda signal dena

Chapter 8

Assessment aur Evaluation (Jaanch aur Tashkhees)

Ustaad ko kese pata chale ke bache ne kya seekha? Assessment, measurement, testing, evaluation - in chaar alfaaz ka farq aur formative/summative jaanch ke usool teacher tests ki jaan hain.

Notes - Asaan Alfaaz Mein

- **Chaaron alfaaz ka farq: Test** woh auzaar (tool) hai - sawalon ka set. **Measurement** number dena hai (masalan 40 mein se 32 number) - ye miqdari (quantitative) hai. **Assessment** maloomat ikattha karna hai - test, mashahide (observation), project, zabani sawal sab se. **Evaluation** sab se wasi hai - ikatthi maloomat par **faisla aur qadr (value judgement)** karna ke taleem kitni kamyab rahi aur aage kya behtar ho.
- **Formative Assessment:** seekhne ke **dorran** hone wali jaanch - period ke andar ke sawal, quiz, homework check. Maqsad number dena nahi, **kamzori foran pakarna aur theek karna** hai. Ise "assessment FOR learning" bhi kehte hain. Acha ustaad har period mein formative assessment karta hai.
- **Summative Assessment:** seekhne ke **aakhir** mein hone wali jaanch - term exam, board exam. Maqsad grade dena, pass/fail aur report tayyar karna hai. Ise "assessment OF learning" kehte hain. Ye zaroori hai magar saal bhar sirf isi par inhisaar karna ghalat hai.
- **Diagnostic Assessment:** parhai se **pehle ya dorran mein mushkil ki asal waja** talash karna - masalan bacha kesra (fraction) kyun nahi samajh raha: kya use taqseem (division) hi nahi aati? Diagnostic assessment doctor ki tashkhees ki tarah hai - ilaaj (remedial teaching) is ke baad hi sahi hota hai.
- **Ache Test ki khoobiyan - Validity: Validity** ka matlab: test wahi naape jo napne ke liye bana hai. Agar maths ke test mein itni mushkil angrezi ho ke bacha maths aane ke bawajood fail ho jaye, to test valid nahi - woh maths nahi, angrezi nap raha hai.
- **Reliability aur Objectivity: Reliability** yani bar bar ek jaisa nateeja - aaj aur kal wohi bacha takreeban wohi number laye, aur do examiners ek hi copy par takreeban ek jaisi marking karein. **Objectivity** yani marking examiner ki pasand-na-pasand se azad ho - **MCQ test sab se zyada objective** hota hai kyunke us ka jawab tay shuda hota hai.
- **Test ki aqsaam: Objective type** - MCQ, true/false, fill in the blanks, matching; marking tez aur objective, magar andaza (guessing) mumkin hai. **Subjective/Essay type** - tafseeli jawab; bache ki tehreer aur soch zahir hoti hai magar marking mein examiner ka farq aa sakta hai. Dono ka mila jula paper behtar hota hai.
- **Norm aur Criterion Referenced: Norm-referenced** mein bache ko **dusre bacho se muqabla** karke napte hain (class mein pehla kon?) - competition walay tests aise hote hain. **Criterion-referenced** mein bacha ek **tay shuda mayaar** se napa jata hai (kya woh 20 mein se 15 jama ke sawal hal kar sakta hai?) - classroom tests aise hone chahiyein.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Formative vs Summative - ek nazar mein

Formative: dorran-e-taleem, roz class mein, kamzori theek karne ke liye.

Summative: aakhir mein, term/board exam, grade ke liye.

Diagnostic: waja talash karna, ilaaj se pehle.

Box 2: Validity vs Reliability - asaan misal

Wazan napne wali machine se bukhar napna: invalid (ghalat cheez).

Har dafa alag wazan batane wali machine: unreliable.

Sahi cheez + har dafa ek jaisa nateeja: valid + reliable.

Aam Ghaltiyan - Common Mistakes

- Formative seekhne ke DORRAN hoti hai, summative AAKHIR mein - ye tartib ulta karna sab se aam ghalti hai.
- Validity "sahi cheez napna" hai aur reliability "har dafa ek jaisa nateeja" - dono mein farq lazmi yaad rakhein.
- Measurement sirf number hai; evaluation mein number par FAISLA (judgement) bhi shamil hai - evaluation wasi hai.
- MCQ sab se objective hota hai, essay sab se subjective - "essay objective hota hai" wala option ghalat hai.

Practice MCQs

1. Evaluation is broader than measurement because evaluation includes:

(a) Only marks (b) Value judgement along with measurement (c) Only written tests (d) Only attendance record

2. Assessment conducted during the teaching-learning process to improve learning is called:

(a) Summative assessment (b) Formative assessment (c) Diagnostic assessment (d) Placement assessment

3. The final examination at the end of a term is an example of:

(a) Formative assessment (b) Diagnostic assessment (c) Summative assessment (d) Informal assessment

4. Assessment done to find out the exact cause of a student’s learning difficulty is:

(a) Summative assessment (b) Formative assessment (c) Annual assessment (d) Diagnostic assessment

5. Formative assessment is also known as:

(a) Assessment for learning (b) Assessment of learning (c) Assessment of teaching (d) Assessment for grading

6. Validity of a test means that the test:

(a) Gives the same result every time (b) Is very lengthy (c) Measures what it is intended to measure (d) Is very easy

7. Reliability of a test means:

(a) It measures the right thing (b) It has many questions (c) It is prepared by experts (d) Consistency of results when used again

8. Which type of test is the most objective in marking?

(a) Multiple choice (MCQ) test (b) Essay type test (c) Oral test (d) Handwriting test

9. Essay type tests are weak mainly because of:

(a) They take less time (b) Subjectivity and inconsistency in marking (c) They have fixed answers (d) They need no preparation

10. In norm-referenced testing, a student's performance is compared with:

(a) A fixed standard (b) His own previous record only (c) The teacher's expectation only (d) The performance of other students

11. In criterion-referenced testing, performance is judged against:

(a) Other students of the class (b) Students of other schools (c) A pre-defined standard or criterion (d) Last year's class

12. Measurement mainly deals with:

(a) Value judgement (b) Quantitative description (numbers/marks) (c) Moral training (d) Guidance and counselling

13. A test is given to identify weak and bright areas before starting remedial teaching. This assessment is:

(a) Diagnostic (b) Summative (c) Final (d) Board

14. Which of the following increases the reliability of a test?

(a) Unclear and lengthy questions (b) Clear instructions and objective marking (c) Marking by mood of examiner (d) Very few questions

15. Homework checking and class questioning during a lesson are examples of:

(a) Formative assessment (b) Summative assessment (c) Board examination (d) Entrance test

16. The main purpose of assessment in the classroom is to:

(a) Create fear among students (b) Rank students only (c) Complete official records only (d) Improve teaching and learning

17. "Assessment of learning" is another name for:

(a) Formative assessment (b) Diagnostic assessment (c) Summative assessment (d) Peer assessment

Answer Key - Chapter 8

1. (b) 2. (b) 3. (c) 4. (d) 5. (a) 6. (c) 7. (d) 8. (a) 9. (b) 10. (d) 11. (c) 12. (b) 13. (a) 14. (b) 15. (a) 16. (d) 17. (c)

Try Yourself - Quick Drills

1. Seekhne ke dorran wali jaanch ko kya kehte hain?
2. Validity ka matlab kya hai?
3. Sab se objective test konsa hota hai?
4. Kamzori ki asal waja talash karna konsi jaanch hai?
5. Measurement aur evaluation mein farq?

Drill Answers: 1. Formative assessment 2. Test wahi naape jiske liye bana hai 3. MCQ (objective type) test 4. Diagnostic assessment 5. Measurement number hai; evaluation

number + faisla

Chapter 9

Curriculum (Nisaab) - Matlab aur Aqsaam

Curriculum woh naqsha hai jis par poora school chalta hai. Is chapter mein curriculum ka asal matlab, syllabus se farq, us ke hisse aur hidden curriculum jese aham tasawwuraat diye gaye hain.

Notes - Asaan Alfaaz Mein

- **Curriculum ka matlab:** lafz "curriculum" Latin lafz **"currere"** se aaya hai jis ka matlab hai "race ka rasta / dorna" - yani woh rasta jis par chal kar bacha manzil (maqsad) tak pohanchta hai. Wasee maanon mein curriculum school ke **tamam tajurbaat** hain jo bacha school mein hasil karta hai - parhai, khel, muqablay, ustaad ka rawaiya, sab kuch.
- **Curriculum aur Syllabus ka farq: Syllabus** sirf ek subject ke topics ki fehrist hai jo saal mein parhaye jayenge. **Curriculum** us se boht wasi hai - us mein maqasid (objectives), tamaam subjects, activities, assessment aur school ke tamam tajurbaat shamil hain. Short mein: syllabus curriculum ka **ek hissa** hai.
- **Curriculum ke bunyadi hisse (components):** chaar aham hisse: (1) **Objectives** - hum kya hasil karna chahte hain; (2) **Content** - kya parhana hai; (3) **Methods/Activities** - kese parhana hai; (4) **Evaluation** - kese check karna hai ke maqsad hasil hua. In chaaron mein se koi ek badle to baqi teenon par asar parta hai.
- **Hidden Curriculum:** woh seekh jo **kitabon mein likhi nahi hoti** magar bacha school ke mahaul se seekhta hai - ustaad ki waqt ki pabandi se "waqt ki qadr", safai se "safai ki aadat", na-insafi se "na-insafi aam hai". Ye poshida (hidden) curriculum kabhi kabhi likhe hue curriculum se zyada taqatwar hota hai - is liye school ka mahaul khud ek sabaq hai.
- **Curriculum ki aqsaam: Subject-centered** - markaz subject aur kitabi maloomat (purana rawaj). **Child-centered (learner-centered)** - markaz bache ki zaroorat aur dilchaspi. **Activity-centered** - markaz kar ke seekhna. **Core curriculum** - woh lazmi hisse jo sab ke liye ek jaisay hain (zuban, hisaab waghera). Jadeed rujhan child-centered aur activity-based ki taraf hai.
- **Co-curricular activities:** khel, taqreebi muqablay (debates), scouting, science exhibition - ye **curriculum ka hissa** hain, us se bahar nahi. In se bache mein leadership, team work aur khud-aitmadi banti hai. Jo school inhein "waqt ki barbadi" samjhe, woh curriculum ki wasee definition nahi samjhta.
- **Curriculum tabdeel kyun hota hai:** zamana badalta hai - nayi science, nayi technology, samaj ki nayi zarooratein. Is liye curriculum waqfay waqfay se **revise** hota rehta hai. Pakistan mein National Curriculum aur ab Single National Curriculum ki koshishein isi silsilay ki kari hain - maqsad: tamam bacho ko ek jaisa bunyadi mayaar.
- **Ache curriculum ki khoobiyan:** woh bache ki **umar aur satah** ke mutabiq ho, zindagi se jura ho, asaan se mushkil ki tartib rakhe, maqami (local) zarooraton ko bhi jaga de, aur flexible ho ke ustaad apni class ke mutabiq kuch tabdeeli kar sake.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Curriculum vs Syllabus - jor yaad karein

Syllabus: ek subject ke topics ki fehrist (hissa).

Curriculum: maqsad + subjects + activities + jaanch (poora).

Misal: Class 5 maths ke chapters = syllabus; school ka poora saal ka nizam = curriculum.

Box 2: Hidden curriculum ki misalein

Ustaad waqt par aaye: bacha waqt ki qadr seekhe.

School ganda ho: bacha safai ko ghair-aham samjhe.

Ustaad sab se ek jaisa salook kare: bacha insaaf seekhe.

Aam Ghaltiyan - Common Mistakes

- Curriculum aur syllabus ek nahi hain - syllabus curriculum ka sirf ek hissa (content fehrist) hai.
- Hidden curriculum KITAB mein nahi hota - ye mahaul aur rawaiyon se milne wali seekh hai.
- Co-curricular activities curriculum se BAHAR nahi hain - woh usi ka hissa hain.
- "Currere" ka matlab race/rasta hai, "kitab" nahi - Latin asal wala sawal aksar aata hai.

Practice MCQs

1. The word "curriculum" is derived from the Latin word "currere", which means:

(a) To run / a race course (b) To read (c) To write (d) To teach

2. Curriculum, in its broad sense, includes:

(a) Only the list of topics in a subject (b) Only textbooks (c) Only examination papers (d) All the experiences a child gains in school

3. A syllabus is:

(a) Broader than curriculum (b) The same as curriculum (c) A part of the curriculum listing topics of a subject (d) A list of holidays

4. The unwritten lessons a child learns from the school environment and teachers' behaviour are called:

(a) Core curriculum (b) Hidden curriculum (c) Subject curriculum (d) Formal syllabus

5. Which of the following is NOT a basic component of curriculum?

(a) Objectives (b) Content (c) School fee structure (d) Evaluation

6. A curriculum centred on the needs and interests of the learner is called:

(a) Subject-centered curriculum (b) Child-centered curriculum (c) Teacher-centered curriculum (d) Examination-centered curriculum

7. Debates, sports and science exhibitions are called:

(a) Co-curricular activities (b) Hidden curriculum (c) Extra burden (d) Non-educational activities

8. Co-curricular activities are:

(a) Outside the curriculum (b) Only for weak students (c) A waste of school time (d) A part of the curriculum

9. Curriculum needs revision from time to time mainly because:

(a) Society, knowledge and technology keep changing (b) Teachers get bored (c) Books become old in colour (d) Students demand new books

10. The sequence of content in a good curriculum should generally move from:

(a) Complex to simple (b) Simple to complex and known to unknown (c) Unknown to known (d) Random order

11. Single National Curriculum in Pakistan aims at:

(a) Closing private schools (b) Ending examinations (c) A common standard of education for all children (d) Teaching only one subject

12. Which curriculum places the subject matter and textbook at the centre?

(a) Child-centered curriculum (b) Activity-centered curriculum (c) Experience curriculum (d) Subject-centered curriculum

13. In an activity-centered curriculum, learning takes place mainly through:

(a) Listening to lectures (b) Memorizing notes (c) Doing and direct experiences (d) Copying from the board

14. Objectives, content, methods and evaluation in a curriculum are:

(a) Interrelated - a change in one affects the others (b) Completely independent (c) Arranged randomly (d) Decided by students alone

15. A child learns punctuality by watching his teacher always coming on time. This is an example of:

(a) Formal syllabus (b) Co-curricular activity (c) Written curriculum (d) Hidden curriculum

16. Core curriculum refers to:

(a) Only science subjects (b) The essential common learning required for all students (c) Only optional subjects (d) Only sports programme

17. A good curriculum should be:

(a) Rigid and unchanged for decades (b) Flexible and according to the age and level of children (c) Only for bright students (d) Focused on examinations only

Answer Key - Chapter 9

1. (a) 2. (d) 3. (c) 4. (b) 5. (c) 6. (b) 7. (a) 8. (d) 9. (a) 10. (b) 11. (c) 12. (d) 13. (c) 14. (a) 15. (d) 16. (b) 17. (b)

Try Yourself - Quick Drills

1. "Currere" ka matlab kya hai?
2. Syllabus aur curriculum mein farq?
3. Hidden curriculum kya hai?
4. Co-curricular activities curriculum ka hissa hain ya nahi?
5. Curriculum ke chaar hisse konse hain?

Drill Answers: 1. Dorna / race ka rasta 2. Syllabus fehrist hai; curriculum poora nizam 3. Mahaul se milne wali ghair-likhi seekh 4. Hissa hain 5. Objectives, Content, Methods, Evaluation

Chapter 10

Inclusive Education, Sawal Poochhna aur Teaching Aids

Aakhri chapter teen aham skills par hai: har bache ko saath le kar chalna (inclusion), ache sawal poochhna, aur teaching aids ka sahi istemal - Dale ke Cone se micro-teaching tak.

Notes - Asaan Alfaaz Mein

- **Inclusive Education:** woh nizam jis mein **khaas zarooraton wale bache (children with special needs)** - kamzor nazar/sunai, zehni ya jismani mushkil wale - aam bacho ke **saath aam hi class** mein parhte hain, alag nahi. Usool ye hai ke har bache ko izzat, mauqa aur us ki zaroorat ke mutabiq madad mile. Alag karna (segregation) jadeed taleem mein durust nahi mana jata.
- **Gifted aur Slow Learner: Gifted** bache aam se zyada tez hote hain - unhein extra challenging kaam aur enrichment activities chahiyein, warna bore hokar peechay reh jate hain. **Slow learner** ko zyada waqt, chhote marhale, zyada misalein aur hosla-afzai chahiye. Dono hi "special attention" ke haqdaar hain - sirf kamzor hi nahi.
- **IQ (Intelligence Quotient):** zehen ki salahiyat napne ka mashhoor formula: **IQ = (Mental Age / Chronological Age) x 100**. Agar zehni umar asal umar ke barabar ho to IQ 100 banta hai, jo average mana jata hai. IQ ek number hai - bache ki poori qabiliyat nahi; ustaad ko kisi bache ko sirf ek number se nahi janchna chahiye.
- **Ache sawal ki khoobiyan:** acha sawal **saaf, mukhtasar aur ek hi nuqte par** hota hai; woh bache ko **sochne** par ubhare. Sawal poochhne ke baad ustaad ko **ruk kar waqt (wait time)** dena chahiye - foran jawab ki umeed class ko sirf tez bacho tak mehdood kar deti hai. Sawal poori class se poochha jaye, jawab ke liye phir kisi ek ko naam se bulaya jaye.
- **Open-ended aur Closed sawal: Closed** sawal ka jawab ek lafz ya tay shuda hota hai ("Pakistan kab azad hua?") - ye yaad-dasht (recall) check karta hai. **Open-ended** sawal mein bacha apni soch deta hai ("Azadi ke baad sab se bari tabdeeli kya ayi, aur kyun?") - ye soch aur tehreer ko ubharta hai. Dono ki apni jagah hai; acha ustaad dono milata hai.
- **Probing (Gehrai wale sawal):** jab bacha jawab de to "kyun?", "misal do", "aur batao" jese sawal us ki samajh ko gehra karte hain - inhein probing questions kehte hain. Agar jawab ghalat ho to bache ko sharminda karne ki bajaye doosra asaan sawal de kar use sahi taraf le jana ustaad ka hunar hai.
- **Teaching Aids aur Dale ka Cone:** aids woh cheezein hain jo sabaq ko asaan karein - chart, model, map, asal cheez (real object), tasveer, blackboard. **Edgar Dale** ne "Cone of Experience" diya: sab se neeche **direct experience (khud karna)** sab se zyada yaad rehta hai; sab se upar sirf **alfaaz (verbal symbols)** sab se kam. Usool: jitna asal tajurbe ke qareeb, utna seekhna pakka.
- **Micro-Teaching:** teacher training ki technique hai jis mein trainee ustaad ek **chhoti class ko chhota sa sabaq (5-10 minute)** parhata hai, sirf **ek skill** par tawajjah de kar (masalan sawal poochhna), phir feedback milta hai aur woh dobara koshish karta hai. Ye tareeqa **Dwight Allen** ne Stanford University mein 1960s mein mutaarif karwaya.

Key Facts - Yaad Rakhne Wale Jor aur Farq

Box 1: Sawal ki do aqsaam - misalein

Closed: "Water ka formula kya hai?" (ek tay jawab).

Open: "Agar pani khatm hone lage to hum kya karein?"

Probing: "Tum ne aisa kyun kaha? Misal do."

Box 2: Aids ka sahi intikhab - umar ke mutabiq

Chhote bache: asal cheezein, rang-birange models, tasaveer.

Bare bache: charts, maps, diagrams, short videos.

Hamesha: blackboard ka saaf aur tartib wala kaam.

Aam Ghaltiyan - Common Mistakes

- Inclusion ka matlab khaas bacho ko ALAG class mein rakhna nahi - aam class mein saath parhana hai.
- IQ ka formula Mental Age / Chronological Age x 100 hai - ulta (CA/MA) karna aam ghalti hai.
- Dale ke Cone mein sab se zyada yaad DIRECT experience se rehta hai, sirf lafzon se sab se kam.
- Micro-teaching mein ek waqt mein sirf EK skill practice hoti hai - poora period ek saath nahi.

Practice MCQs

1. Inclusive education means:

(a) Special children are kept in separate schools only (b) Only gifted children are taught (c) Weak students are promoted without learning (d) Children with special needs learn together with other children in regular classrooms

2. A gifted child in class mainly needs:

(a) More simple copy work (b) To be left alone completely (c) Extra challenging work and enrichment activities (d) Only physical activities

3. The formula for IQ is:

(a) IQ = (Mental Age / Chronological Age) x 100 (b) IQ = (Chronological Age / Mental Age) x 100 (c) IQ = Mental Age + 100 (d) IQ = Chronological Age x 10

4. An IQ of 100 indicates:

(a) Very high intelligence (b) Below average intelligence (c) No intelligence (d) Average intelligence

5. A question whose answer requires the student to think and give his own view is called:

(a) Closed question (b) Open-ended question (c) Yes/no question (d) Recall question

6. "In which year did Pakistan come into being?" is an example of a:

(a) Closed (recall) question (b) Open-ended question (c) Probing question (d) Leading question

7. Follow-up questions like "Why do you think so? Give an example" are called:

(a) Closed questions (b) Irrelevant questions (c) Probing questions (d) Trick questions

8. After asking a question, a good teacher should:

(a) Give wait time so that all students can think (b) Answer the question himself at once (c) Ask only the brightest student (d) Move to the next topic immediately

9. According to Dale’s Cone of Experience, learning is most lasting through:

(a) Reading words only (b) Listening to lectures only (c) Direct, purposeful experience (learning by doing) (d) Looking at symbols only

10. The "Cone of Experience" was given by:

(a) Benjamin Bloom (b) Edgar Dale (c) B. F. Skinner (d) John Dewey

11. Micro-teaching is a technique used for:

(a) Teaching very small children (b) Teaching with a microphone (c) Shortening the syllabus (d) Training teachers in one specific teaching skill at a time

12. Micro-teaching was developed by:

(a) Kilpatrick (b) Herbart (c) Froebel (d) Dwight Allen

13. In micro-teaching, a trainee teaches:

(a) A small group for a short time, practising one skill (b) A full class for a full day (c) All skills in one lesson (d) Only theory without practice

14. Charts, models, maps and real objects used in teaching are called:

(a) Teaching methods (b) Teaching skills (c) Teaching aids (d) Curriculum

15. Which aid is generally most effective for small children?

(a) Only verbal explanation (b) Real objects and models (c) Long written notes (d) Abstract diagrams

16. A teacher who accepts all children and adjusts his teaching to different needs is practising:

(a) Selective teaching (b) Inclusive teaching (c) Strict teaching (d) Rote teaching

17. For a child with weak eyesight, the teacher should:

(a) Seat him at the back (b) Exempt him from all work (c) Give him a front seat and write in large clear letters on the board (d) Ignore his difficulty

Answer Key - Chapter 10

1. (d) 2. (c) 3. (a) 4. (d) 5. (b) 6. (a) 7. (c) 8. (a) 9. (c) 10. (b) 11. (d) 12. (d) 13. (a) 14. (c) 15. (b) 16. (b) 17. (c)

Try Yourself - Quick Drills

1. Inclusion ka matlab kya hai?
2. IQ ka formula kya hai?
3. Cone of Experience kis ne diya?
4. Micro-teaching kis ne develop ki?
5. Open-ended sawal ki pehchan?

Drill Answers: 1. Khaas bache aam class mein sab ke saath parhein 2. MA/CA x 100 3. Edgar Dale ne 4. Dwight Allen ne 5. Jawab mein bache ki apni soch aati hai

Final Test

Mixed Practice Test

Ye test tamam chapters se mila jula hai - bilkul asal test ki tarah. Waqt note karein aur khud ko check karein.

1. The Project Method was introduced by:

(a) Herbart (b) Pavlov (c) Bloom (d) Kilpatrick

2. The first step of Herbart's lesson plan is:

(a) Preparation (b) Application (c) Generalization (d) Evaluation

3. In the revised Bloom's Taxonomy, the top level is:

(a) Evaluating (b) Applying (c) Creating (d) Remembering

4. Piaget's concrete operational stage is from:

(a) 0 to 2 years (b) 2 to 7 years (c) 11 to 18 years (d) 7 to 11 years

5. Classical conditioning was demonstrated by Pavlov with:

(a) Dogs (b) Cats (c) Rats (d) Monkeys

6. The Zone of Proximal Development belongs to:

(a) Piaget (b) Vygotsky (c) Skinner (d) Thorndike

7. Assessment done during the learning process is called:

(a) Summative assessment (b) Diagnostic test (c) Board exam (d) Formative assessment

8. Validity of a test means it measures:

(a) Very quickly (b) With many questions (c) What it is intended to measure (d) Only difficult content

9. The Latin word "currere" is the origin of:

(a) Syllabus (b) Curriculum (c) Pedagogy (d) Evaluation

10. Hidden curriculum refers to learning from:

(a) School environment and behaviours, not written in books (b) Textbooks only (c) Examination papers (d) Home work copies

11. Praise given immediately for good work is an example of:

(a) Punishment (b) Positive reinforcement (c) Extinction (d) Forgetting

12. The Cone of Experience was presented by:

(a) Edgar Dale (b) Benjamin Bloom (c) Lev Vygotsky (d) Edward Thorndike

13. According to Article 25-A, free and compulsory education in Pakistan is for children aged:

(a) 3 to 10 years (b) 6 to 18 years (c) 5 to 12 years (d) 5 to 16 years

Answer Key - Mixed Practice Test

1. (d) 2. (a) 3. (c) 4. (d) 5. (a) 6. (b) 7. (d) 8. (c) 9. (b) 10. (a) 11. (b) 12. (a) 13. (d)

Quick Chart

Bloom's Taxonomy Quick-Chart

Test se pehle ye chart ek nazar zaroor dekhein - cognitive domain ki chhe sattayein (revised), un ke matlab aur har satah ke pehchan walay verbs ek hi jagah. Neeche se upar satah barhti jati hai; sab se unchi satah Creating hai.

Level	Matlab	Action Verbs
Remembering	Yaad karna	define, list, name
Understanding	Samajhna	explain, summarize
Applying	Istemal karna	solve, use, demonstrate
Analyzing	Tajziya	compare, differentiate
Evaluating	Parakhna	judge, justify
Creating	Naya banana	design, compose, construct

Word List

Pedagogy Glossary - Alfaz ke Matlab

Is list mein is book ki aham istilahat (terms) ke asaan matlab diye gaye hain. Jo lafz samajh na aaye, yahan se dekh lein.

- **Pedagogy:** bacho ko parhane ka ilm aur hunar (science and art of teaching children).
- **Andragogy:** badon (adults) ko parhane ka ilm.
- **Learning:** tajurbe se ravaiye mein nisbatan mustaqil tabdeeli.
- **Curriculum:** school ke tamam tajurbaat aur maqasid ka mukammal nizam; Latin "currere" (dor ka rasta) se aaya.
- **Syllabus:** ek subject ke topics ki fehrist - curriculum ka ek hissa.
- **Hidden Curriculum:** woh seekh jo kitabon mein nahi hoti magar school ke mahaul aur rawaiyon se milti hai.
- **Lesson Plan:** ek period ki parhai ka pehle se tayyar karda tafseeli khaaka (blueprint).
- **Objective:** woh tay shuda nateeja jo sabaq ke baad bache ke amal mein zahir ho.
- **Taxonomy:** cheezon ko darjon/sattayon mein tartib dene ka nizam (masalan Bloom ki taxonomy).
- **Cognitive Domain:** zehen aur soch se jura hissa - maloomat, samajh, istemal.
- **Affective Domain:** jazbaat, dilchaspi aur qadrein (values) ka hissa.
- **Psychomotor Domain:** jismani aur haath ke hunar ka hissa.
- **Conditioning:** kisi amal ya mahaul ke saath jor ban kar seekhna (Pavlov: classical; Skinner: operant).
- **Reinforcement:** woh amal jo kisi rawaiye ko barha de - tareef, inaam ya nagawar cheez ka khatma.
- **Scaffolding:** seekhne ke doran di jane wali aarzi madad jo ahista ahista hata li jati hai.
- **ZPD:** Zone of Proximal Development (Vygotsky) - akela kar sakna aur rehnumai se kar sakna ke darmiyan ka faasla.
- **Assessment:** seekhne ki maloomat ikattha karna - test, mashahida, sawal waghera se.
- **Evaluation:** assessment ki maloomat par faisla aur qadr (judgement) karna.
- **Validity:** test wahi naape jis ke liye bana ho.
- **Reliability:** test ka bar bar ek jaisa nateeja dena (consistency).
- **Motivation:** seekhne ki taraf ubharnay wali andar ya bahar ki taqat (targheeb).
- **Inclusive Education:** khaas zarooraton wale bacho ko aam bacho ke saath aam class mein parhana.
- **Micro-Teaching:** teacher training ki technique - chhoti class, chhota sabaq, ek skill, phir feedback.

Exam Tips

- Naamon ke jor pakke karein: Pavlov-classical, Skinner-operant, Thorndike-trial & error, Vygotsky-ZPD, Bloom-taxonomy, Herbart-lesson steps, Kilpatrick-project, Froebel-kindergarten, Dale-Cone, Allen-micro-teaching.

- Piaget ki umar wali seedhi rattein: 0-2 Sensorimotor, 2-7 Preoperational, 7-11 Concrete, 11+ Formal. Primary bache Concrete mein hain - ye sawal har paper mein hai.
- Revised Bloom mein sab se upar CREATING hai; purani mein Evaluation tha. Sawal mein "revised" lafz aaye to jawab badal jata hai - ghor se parhein.
- Formative = dorran, Summative = aakhir. Is ek line se assessment ke aadhe sawal hal ho jate hain.
- Validity = sahi cheez napna; Reliability = har dafa ek jaisa nateeja. Dono ki misal (wazan wali machine) zehen mein rakhein.
- Negative reinforcement saza NAHI hai - woh bhi rawaiya barhata hai. Test setter yahin phasata hai.
- Syllabus curriculum ka hisa hai, us ke barabar nahi. "Curriculum broad hai" wala option aam tor par sahi hota hai.
- Article 25-A: 5 se 16 saal, muft aur lazmi taleem - Pakistan walay sawal mein number ulta kar ke diya jata hai.
- Objective test (MCQ) sab se objective, essay sab se subjective. Marking wale sawalon mein yahi usool lagta hai.
- Har chapter ke aakhir mein Answer Key se apne jawab check karein; jo sawal ghalat ho usi note ko dobara parhein - yahi asli revision hai.

Best of luck! Mehnat kabhi zaya nahi jati - roz ka thora sa parhna, kal ki bari kamyabi banta hai. - MR Academy
